Penetration tester

@[Linkedin](#)

@[Medium](#)

@[Github](#)

@[My Website](#)

## Experience:

---

Junior Cyber Security Engineer

- I conducted penetration testing for web applications, wrote technical reports, and communicated with clients through email and other channels.

FreeLance web development

- Make WebApp Frontend And Backend

## ACHIEVEMENTS:

---

- Create tools to help penetration testers and bounty hunters such as ([HackJS](#)) And also made a tool to simulate the reverse shell ([Reverse Shell](#)).
- Make Write Ups related to cybersecurity such as networks , encryption and vulnerability in ([Linkedin](#)) And ([medium](#))
- [My website](#) has two pages for Bug Bounty Hunters: one offers encryption/decryption tools, and the other provides ready-made Google Dorks for finding vulnerabilities

## SKILLS:

---

- |                                    |              |                   |
|------------------------------------|--------------|-------------------|
| • Python , bash , javascript , php | • Metasploit | • Burp Suite      |
| • Web Attacks (OWASP TOP 10)       | • Linux      | • Web Development |
| • Bug Hunting                      | • CTF Player |                   |

## Courses:

---

- |              |               |                 |
|--------------|---------------|-----------------|
| • eJPT (ine) | • eWAPT (ine) | • OSCP (offsec) |
